USAID
FROM THE AMERICAN PEOPLE

SIAPS 
Systems for Improved Access
to Pharmaceuticals and Services

This report is made possible by the generous support of the American people through the US Agency for International Development (USAID), under the terms of cooperative agreement number AID-OAA-A-11-00021. The contents are the responsibility of Management Sciences for Health and do not necessarily reflect the views of USAID or the United States Government.

About SIAPS

The goal of the Systems for Improved Access to Pharmaceuticals and Services (SIAPS) Program is to ensure the availability of quality pharmaceutical products and effective pharmaceutical services to achieve desired health outcomes. Toward this end, the SIAPS result areas include improving governance, building capacity for pharmaceutical management and services, addressing information needed for decision making in the pharmaceutical sector, strengthening financing strategies and mechanisms to improve access to medicines, and increasing quality pharmaceutical services.

FOREWORD

Medical equipment items are the most expensive material goods in a health care facility. As part of technical assistance from USAID-supported SIAPS (implemented by MSH) to ensure access to quality products, we have developed a standard table of equipment (TOE) in collaboration with the Ministry of Health and Family Welfare (MOHFW). This TOE is a prerequisite tool of health care technology management for equipment used at 10-, 20-, 50-, 250-, and 500-bed health facilities.

This Price Guide (PG) provides reasonable and reliable information on medical equipment prices based on specifications mostly reflected in the TOE. The information in this PG builds on Central Medical Stores Depot (CMSD) data from past orders, local suppliers information, extracts from various websites, informed estimates based on past experiences and consultant's own database.

We hope this PG will provide the necessary information about the estimated prices that might be required during planning and evaluation of the procurement of medical equipment to help the different components of the MOHFW's procurement and supply management cycles make informed decisions when procuring medical equipment from different entities.

ACKNOWLEDGMENTS

First of all, we would like to express our sincere gratitude to MOHFW's respective policy makers; professors, associate professors, and assistant professors of medical college hospitals and specialized hospitals; Line directors (LDs) and program managers of the Directorate General of Health Services (DGHS); dedicated managers of the National Electro-Medical Equipment Maintenance Workshop (NEMEW) and Training Center; civil surgeons and consultants of district hospitals; the director and dedicated staff of CMSD as key procuring entities of medical equipment; and upazila health and family planning officers who provided their support and participated in consensus building workshops for this assignment.

Finally, SIAPS would like to express its sincere thanks and appreciation to short-term international and local consultants for providing their perspectives on the standardization of Price Guide of medical equipment for this document.

EXECUTIVE SUMMARY

The SIAPS Program funded by USAID and implemented by MSH in collaboration with the MOHFW has developed this medical equipment PG to help public health care facilities of Bangladesh create a realistic annual procurement plan and purchase safe, efficient, and fairly priced medical equipment.

With modern technology, no health care facility can deliver sound health services without medical equipment, clinical engineering, and technology professionals. Medical equipment planning is, therefore, the most important factor for establishing a new hospital and for continuing to provide quality hospital services. And in most developed countries, the health system typically follows standard rules, regulations, and practices of health care technology.

However, a durable investment in medical equipment comes with a major cost, so it is key to ensure the best value. When procuring medical equipment, one should also consider other aspects of the process such as selection, quantification, bidding, quality assurance, and expeditious clearance and receipt of the procured items.

This PG uses data from CMSD about past orders, local supplier information, excerpts from various websites, and informed estimates based on past experiences to provide as accurately as possible reasonable and reliable information on the prices of approximately 500 pieces major medical equipment and medical furniture for comparison. We have organized the equipment by category of services and type of equipment and provided the prices for a one-two year warranty, a three-year warranty and, for some special equipment, five-year warranty.

This PG can be used as a reference price to:

- Determine the probable cost of products
- Compare current prices paid with prices available on the international market
- Plan budgets and programs
- Estimate cost of packages and evaluate bids
- Assess the potential financial impact of changes to current medicines list
- Support education about rational medicine use
- Planning new hospital

When developing indicative prices, it is necessary to note specifications for each of the products in the TOE and past procurements.

We recommend that the MOHFW strategically decide on medical equipment pricing and acquisition and follow the approved TOE to ensure need-based procurement planning of medical equipment. Comparative price information is important for getting the best price and avoiding unfair procurement practices, and this PG is an essential reference for anyone involved in the medical equipment procurement process.

BACKGROUND

In a transparent procurement method, bids from competing contractors, suppliers, or vendors are invited by openly advertising the scope, specifications, and terms and conditions of the proposed contract as well as the criteria by which the bids will be evaluated. Competitive bidding aims to obtain goods and services at the lowest prices by stimulating competition and preventing favoritism. To help you make better decisions on pricing and on the quality and utility of medical equipment, this PG will indicate whether a price is too high or too low—both of which may indicate issues about reliability and fair pricing.

Medical equipment prices depend on many continually changing factors, including Specifications, list of spare parts or accessories, exchange rates, shipping costs, labor rates, installation conditions, and warranty. So the only way to obtain current accurate costs is to request a formal quotation from a manufacturer or authorized supplier, which is usually time consuming.

Each medical equipment item particularly the highly technical ones can be specified in a multitude of ways, meaning the same equipment can be operated by different means with different outputs. And this means each specification could have a different cost. One must also not ignore the impact that technological advances have on price.

This PG will:

- Help you avoid sub-standard equipment purchases
- Serve as an indicative price benchmark in the bidding process
- Increase efficiency and economy in the procurement process, thereby reducing rebidding
- Enable MOHFW's procuring entities, LDs, and health facilities to develop a realistic procurement plan with estimated unit prices for items

The MOHFW implementing the Health, Population, and Nutrition Sector Program (HPNSP) since July 2017 to ensure quality and equitable health care for all citizens of Bangladesh. The program aims to stimulate demand and improve access to and utilization of health, population, and nutrition services. Improved access and utilization will reduce maternal, child, and infant morbidity and mortality; decrease population growth; and improve nutritional status among women, children, and the vulnerable population. Access to the right diagnostics and better equipped facilities is seen as key to improving access to care and treatment.

Under HPNSDP, electro-medical equipment and instruments are procured to support treatment and care for all levels of health facilities (i.e., primary, secondary, and tertiary and specialized hospitals). Well-functioning medical equipment is seen as essential for providing effective and efficient health services, and the procurement of medical equipment is considered a major part of the public sector health investment in Bangladesh, requiring close monitoring.

However, estimating unit prices of medical equipment is a real challenge for health facilities' user departments and LDs, keeping them from making realistic procurement plans. With the mandate for system strengthening and capacity building of the USAID/SIAPS project, the

MOHFW needs technical assistance to develop an updated PG for medical equipment using a market survey. On behalf of the MOHFW, SIAPS engaged both an international and a local consultant on a short-term basis with relevant experience to develop the price guide for medical devices and equipment.

To strengthen the different components of MOHFW's procurement and supply management cycles—especially for medical equipment—an assessment of the current status of medical equipment and its management was conducted by studying a representative sample of equipment supplied under the Health and Population Sector Program from 2000 to 2005. The assessment was funded by the International Development Association and the Multi-Donor Trust Fund (managed by the World Bank), conducted by Simed International, and named the “Bangladesh Medical Equipment Survey 2008”. The assessment found that only 50% of equipment supplied under the program from 2000 to 2005 was effectively used at its final destination. The main reasons behind ineffectiveness of the other 50% of the equipment were noted as the lack of comprehensive equipment planning, failures in the delivery system, absence of adequate maintenance, and combinations of these. The survey provided MOHFW with recommendations, one of which was to formulate and apply a standard TOE for all levels of health service delivery. Based on that recommendation, DGHS drafted a policy guideline for the Medical device in January, 2013.

In 2012, Simed International conducted another study of the equipment supplied from 2006 to 2011 under the Health, Nutrition and Population Sector Program (HNPS). Based on the study findings, Simed International proposed establishing a medical technology department at the MOHFW, along with drafting a TOE for 10-, 20-, 31-, 50-, 100-, 250-, and 500-bed hospitals. Following this, in a meeting with Honorable Minister for MOHFW on September 22, 2013, SIAPS was asked to update the standard TOE for MOHFW. Later, this was also discussed in the development partners' meeting held in January 2014 and included in the follow-up action plan of the Bangladesh Medical Equipment Survey 2012 facilitated by the World Bank.

As MOHFW proceeded strategically toward upgrading and standardizing primary and secondary level health facilities, the primary level would include only 50-bed hospitals and the secondary level would include only 250-bed hospitals. Finally, it was decided that SIAPS would develop a TOE for 50-bed health facilities in the Upazila region (a sub-district level), 250-bed facilities at district level, and 500-bed and higher facilities for medical college hospitals. Later, the MOHFW requested SIAPS to include 10- and 20-bed facilities for rural health centers under DGHS and maternal and child welfare centers under Directorate General of Family Planning.

Assignment Objective

The consultancy's objective was to produce an updated and comprehensive medical devices and equipment PG for MOHFW, its different LDs, and CMSD based on past procurement practices, current international and local supplier price information, and accepted specifications of standard medical devices and equipment.

The PG includes the following parameters:

- Equipment's final destination point (i.e., CMSD, DGHS, Dhaka, Bangladesh)
- Consideration of a one- to five-year warranty period range
- Different country of origin/variation in price/carriage and insurance paid (CIP) for international suppliers, and ex works deliver (EXW) for locals
- Brief description of each item and an indicative price (if there is no information on price from suppliers, then reliance on the Internet and past experiences should be acceptable)
- Based on pricing information, development of comparators and collate prices by range for the same/similar equipment (min/med/max/average, etc.)

METHODOLOGY

The consultant gathered information from discussions with relevant stakeholders, information on previous medical equipment contracts issued by CMSD, reviews of past and present orders for medical equipment, and discussions with suppliers. The SIAPS country team expedited the contracts for the sources of information and arranged for the meetings. The technical sessions were held with different stakeholders and comments/suggestions were incorporated in the final PG.

The pricing exercise was based on the following:

- The TOE for up to 500-bed hospitals for selecting the medical equipment as it was assumed to be most inclusive of all lists. Individual items on the TOE were compared with those that were listed within the various contracts in the past three years; those similar items with identified prices were earmarked accordingly.
- MOHFW contracts for medical equipment over the past three years. Procurement desk numbers one to six at CMSD issued the contracts. Contract for medical equipment only from each desk was transformed into a suitable format and transferred on to an allocated sheet.
- Information and prices from suppliers
- Search sources from the electronic media
- Consultants private and personal database
- In the unlikely event, where gaps remained an educated guess was considered

A presentation was given to all attending a total of 29 representatives of local and international suppliers, all of which were encouraged to submit their prices and specifications for traded medical equipment.

Nine suppliers who were commended for their compliance provided procurement information (S.S. Scientific Corporation, Tradevision limited, Bengal Scientific & Surgical Co., Stream limited, Transmed Limited, Diamed, Pantech Enterprise Pvt. Ltd., Sunny Trading Agency, and Meditel[Pvt] Ltd).

The list of equipment was sorted in alphabetical order; medical equipment only were itemized to be used as the basis for the PG. Further additional items were added that were not covered by the TOE. Prices were unified in US dollars at exchange rates that were current at the time.

Items that were duplicated, unique, or in excess of requirement of this report within the supplier information were not used. Prices should be reviewed and updated on periodically as rates change to remain accurate.

SPECIFICATIONS

Specification determines the capital cost. We suggest using the following specifications as a guide:

- Specification of items as ordered (specification already issued and contracted by CMSD)
- Specifications suggested as general (generic and basic specifications for general medical equipment)

All specifications are intended to serve as only a guide and should be adjusted by the technical team as necessary. Specifications for all items must be reviewed regularly, ensuring details are generic, un-biased, and transparent with clear approximate parameters. Special emphasis must be placed on the more technical equipment to safeguard quality and technological advancement.

The guide has attached brief specifications (as 'Specifications' annexure) for the indicated prices of the items in the 'The Prices' annexure. It is advisable to consult the detailed specifications of the items in the home page of the Supply Chain Management Portal (SCMP) under 'resources'.

All past orders were based on a set of detailed technical specifications. Although these specifications may indicate the level of equipment acquired, they are actual past purchases and over time can change in price and specification due to variables such as technological advances, exchange rates, and labor rates.

The following are price types employed in this PG:

EXW: In contrast to the definition of ex-Works in the INCOTERM, the cost is based on prices of equipment already imported. Three estimates are provided: two-year warranty, three-year warranty and five-year warranty for applicable cases.

CIP: Cost includes Insurance and Freight paid up to the place of destination. Three estimates are provided: two-year warranty, three-year warranty and five-year warranty for applicable cases.

FOB: As mentioned in the INCOTERM, costs includes delivery of goods to designated vessel including loading. It doesn't include insurance and freight.

A: Estimates of mean costs based on prices from higher cost origin (from EU, USA, Japan, Canada, etc.).

B: Estimates of mean costs based on prices from lower cost origin (China, India, Pakistan, Korea, etc.).

Warranty

The most common warranty is a manufacturer or supplier warranting that the product is free from defects in materials and workmanship. This simply promises that the manufacturer properly constructed the product out of proper materials and implies that the product will perform for its intended purposes for a set period of time. This warranty does not include routine maintenance and does not cover wear and tear, misuse, and consumables, among other issues. The warranty conditions and details are always listed in small print and dictated by the manufacturer; in cases of extended warranty, this may vary and should be carefully considered before committing to extend the standard warranty time. In cases of high-quality equipment, extending the warranty from one year to three years would not have a great impact on the price. But on the lower end of quality, this may render the price higher because the supplier expects multiple breakdowns.

Just about all products come with a standard manufacturer's warranty, which typically covers the purchase for one year. Although the majority of minor malfunctions occur within the first year, major problems are more apt to occur much later. One may think that an extended warranty will cover anything that goes wrong with the purchase, but inevitably this is not true. Extended warranties are typically rife with exclusions and fine print. Be sure to read the terms and conditions to make sure it offers adequate protection.

The cost of extending the warranty may be higher than that indicated in this PG. This is mainly because most major breakdowns that arise on the more complex equipment appear later in life and, in government procurement, the warranty is accompanied by Performance Guarantee from the supplier. We strongly recommend weighing the economics of the five-year warranty, as it may not be commercially feasible to pay extra for a warranty that is superfluous to your needs. Items with different life cycles differ in requirements.

Using the PG

The PG is a continuous work in progress, and items listed will change with time; therefore, an annual official update is recommended.

To extract an evaluation for an item, one should first identify the item's specification; different specifications for the same item may result in a large variance of price. For example, Mayo scissors—a type of surgical scissors—may be made from stainless steel or titanium, have a polished or brushed finish, come in standard or extra-long sizes, and be straight or curved-bladed. Different varieties of Mayo scissors are used in all types of surgeries and come from numerous manufacturers around the world.

After selecting an item's specifications, select a similar item with similar specifications; the PG can be used to verify whether the estimated price(s) of an item(s) in the procurement plan are in line with standard or market prices.

Items heavily loaded with accessories would lean toward the high end of the price range, while basic items would lean toward the lower end.

Caution must be exercised when choosing specifications and costs as the variance is usually large between similar items from different sources. One has to consider the manufacturing, shipping, style of equipment, accessories, and currency, among other specifications.

The budgets within this PG are subject to:

- Estimates of any additional tasks required from the supplier
- Exchange rates to be adjusted
- Taxes, when applicable
- Date of when the procurement took place (If the expectation is more than six months from date of budget, an inflationary factor may be added.)
- Destination of equipment
- Changes in standards and conditions

Conversely, the price of an item fluctuates with the changes caused by the following factors:

- **Innovativeness:** Technologically updated item costs more than older models
- **Size:** The bigger the capacity the higher the price
- **Specifications:** High specification comes at a cost
- **Functions:** More functions increase the price
- **Accessories:** More accessories would increase the price
- **Brand:** Some brands cost more than others for same equipment
- **Consumables:** Startup consumables are free; anything extra will cost
- **Spare Parts:** If required, they will add to the cost
- **Warranty:** The period above the manufacturer standard is a premium
- **Origin:** Different origins of the same equipment have a different price
- **Destination:** Final destination affects cost
- **Currency:** Fluctuations are ceaseless
- **Inflation:** Time changes the price and varies from one country to another
- **Payment Method:** Banking charges and requiring financing, for example, will increase costs
- **Freight:** Method of shipping (air/sea/land) can increase cost
- **Taxes:** If applicable, they can increase cost
- **Politics:** Sanctions, for example, can increase costs

Principles of Purchasing Management

- Buying material of the right quality
- In the right quantity
- From the right source
- At the right price

- With the right service
- Delivered at the right place
- At the right time
- With the right mode of transport
- With the right contract

Purchasing Cycle/System

- Get requirements from user department with proper specification.
- Send the inquiry to the vendors (suppliers). (Request quotation.)
- Get the quotations from vendors.
- Make comparative statement.
- Negotiate the price and terms and conditions.
- Place the order to the right vendor.
- Follow up with the vendor.
- Get receipt and start inspection. (GRN)
- Prepare storage and record-keeping. (Batching)
- Invoice and provide payment.

Procurement Guideline that Affects Pricing

Previous studies in Bangladesh referenced the findings about budgets in the Bangladesh Medical Equipment Survey 2012. Table 2 clearly shows a great variance between the value package procurement plan and the value contract.

Internet

One can also view web pages to find specifications and prices. It is becoming more acceptable for suppliers to list their equipment online along with prices, catalogs, and manuals; however, prices are indicative only and may be out of date.

The following are examples of reliable websites:

UNICEF

[https://supply.unicef.org/unicef_b2c/app/displayApp/\(layout=7.0-12_1_66_67_115&carearea=%24ROOT\)/.do?rf=y](https://supply.unicef.org/unicef_b2c/app/displayApp/(layout=7.0-12_1_66_67_115&carearea=%24ROOT)/.do?rf=y)

UNICEF has a comprehensive, reliable, and accessible supply catalogue, which includes specifications and indication of price.

WHO

http://www.who.int/medical_devices/en/

http://www.who.int/medical_devices/innovation/core_equipment/en/index1.html

http://www.who.int/medical_devices/innovation/core_equipment/en/

Useful tool for information on medical devices and regulations

MOHFW

<http://www.mohfw.gov.bd/>

Information on local tenders and progress of various projects

Supply Chain Management System (SCMS)

<http://www.scms.pfscm.org/scms/ecatalog/>

Provides information, price, and specifications

National Health Service (NHS)

<http://www.supplychain.nhs.uk/capital/medical-equipment/>

Requires log-in to view current prices and specifications of all equipment

Other private websites from medical suppliers can also be found online but may only be used for informational purposes. Specifications should not be copied as they may bias the final result. However, some may have indicative prices of their goods, which may also be helpful.

Limitations

The PG was limited to a list of medical equipment used in primary and secondary level hospitals (i.e., 50-, 250-bed and 500-bed hospitals), so it is not exhaustive. It does not include instruments, medical surgical requisites (i.e., medical surgical requisite lists), or medical equipment used in tertiary level hospitals.

Key Findings

During the development of the PG, we observed that CMSD procurement desk officers were procuring the same medical equipment at different prices. Therefore, the process may vary even within a procuring entity.

The prices of medical equipment given by nine key suppliers of CMSD were at the upper limit. Also, the specification they provided was of a high upgraded quality that may not always be effective for CMSD.

The technical session and dissemination workshop participants noted their encouragement and requirement to include prices of medical surgical requisites and instrument items in the PG beyond medical equipment. For the next edition of the PG, users would like to see an estimation of the life expectancy of the equipment.

Finally, the prices in this PG are not static and depend on many factors, such as specifications, warranty, spare parts, and added features, as discussed earlier.

Recommendations

- Provide training on how to use the PG.
- Specifications and other information within this report may be published separately to those who need to be informed on the subject.
- PG prices should be restricted to those who have in-depth understanding on the use of such tools.
- Specifications should be updated periodically, particularly the highly technical specifications.
- PG is a work in progress. The indicative specifications and prices should be updated periodically based on contracts placed.
- Contracts should be unified across all procurement desks so they cost the same.
- The warranty period should be unified throughout all equipment.
- Maintenance should be considered for larger technical items, in addition to the warranty.
- Beware of fluctuations in exchange rates when using the PG.
- Every tender is unique. Adjust specifications based on the actual need to suit every tender.
- Adhere to local and international standards.
- Revisit and adjust the PG to suit needs, and provide training every time the PG is updated.

Price Guide of Medical Equipment

Equipment Description	Unit	Price	Model	Code
Cryostat with accessories		\$ 75,000	BDT 2,046,000	BDT 2,167,800
CT Scan: 128 slice	Hydr Pathology Radiology end imaging	\$ 710,000	BDT 57,936,000	BDT 62,571,300
CT Scan: 128 slice	Radiology end imaging	\$ 630,000	BDT 51,408,000	BDT 55,521,000
CT Scan: 64 slice	Radiology end imaging	\$ 785,000	BDT 64,056,000	BDT 69,181,000
CT Simulator	Radiology-IPD	\$ 709,000	BDT 57,120,000	BDT 61,690,000
CTG (Cardiography) Machine	Gynaecology IPD	\$ 5,200	BDT 424,300	BDT 429,900
CTG V-athine	Gynaecology OPD	\$ 5,200	BDT 416,000	BDT 428,600
Cystoscope Adult, flexible, with accessories	Urology OT	\$ 51,500	BDT 4,144,000	BDT 4,481,400
Cystoscope Adult, rigid, with accessories	Urology OT	€ 8,200	BDT 752,800	BDT 769,300
Cystoscope Pediatric, rigid, with accessories	Urology OT	€ 6,700	BDT 615,100	BDT 652,100
Defibrillator, External, Automated	Cardiology Ward	€ 5,500	BDT 504,900	BDT 535,300
Defibrillator, External, Automated	ICU	€ 5,500	BDT 504,900	BDT 535,300
Defibrillator, External, Automated	Respiratory Medicine IPD	€ 5,500	BDT 504,900	BDT 535,300
Dental X-ray	Dental OPD	\$ 4,900	BDT 397,000	BDT 419,700
Dental Chair with Unit	Dental OPD	\$ 2,500	BDT 204,000	BDT 216,200
Digital Centrifuge	Dental OPD	\$ 7,000	BDT 566,000	BDT 576,900
Digital Centrifuge	Blood Bank & Transfusion	€ 1,600	BDT 146,300	BDT 155,700
Distilled Water Plant	Blood Bank & Transfusion	€ 200	BDT 16,300	BDT 16,500
Donor's Chair	Clinical Pathology	€ 1,300	BDT 119,300	BDT 123,600
Dosimetry System (TSP) for Unisc & C	Blood Bank & Transfusion	€ 3,300	BDT 297,000	BDT 306,000
Duodenoscopy, side view (ERCP) with Argon plasma unit	Radiology-IPD	\$ 750	BDT 61,200	BDT 64,800
Duodenoscopy, video with accessories	Gastroenterology IPD (Endoscopy Room)	\$ 500,000	BDT 40,800,000	BDT 41,208,000
Duodenoscopy, video, with ERCP, snt (with diathermy + argon unit)		\$ 85,000	BDT 6,936,000	BDT 7,353,600
ECG Machine, 12 channel	Cardiology OPD	\$ 1,200	BDT 97,900	BDT 103,800
ECG Machine, 3 channel	Cardiology OPD	\$ 400	BDT 32,600	BDT 34,600
ECG Machine, 6 Channel	Medicine OPD	\$ 1,000	BDT 81,600	BDT 86,600
Echocardiogram with Color Doppler	Cardiology OPD	\$ 45,300	BDT 3,672,000	BDT 3,993,000
Echocardiogram, 2D, Color Doppler	Cardiology Ward	\$ 45,000	BDT 3,672,000	BDT 3,993,000
Echocardiogram, Doppler, Vascular	Cardiology OPD	\$ 45,000	BDT 3,672,000	BDT 3,993,000
Echocardiogram, Portable	Cardiology Ward	\$ 36,500	BDT 3,100,800	BDT 3,287,400
Echocardiogram: 4D with Color Doppler	Cardiology OPD	\$ 170,000	BDT 13,872,000	BDT 14,707,100
Echocardiogram: Trans-esophageal	Cardiology OPD	\$ 70,000	BDT 5,712,000	BDT 6,055,900
ECG (Electro-convulsive Therapy) Machine	Psychiatry IPD	\$ 17,000	BDT 1,387,200	BDT 1,470,800
EFCP (Enhanced External Counter Pulsation)	Cardiology OPD	\$ 106,600	BDT 8,812,800	BDT 9,345,900
Electric sucker, Pediatric	Pediatrics Neonatal Ward	€ 715	BDT 64,400	BDT 69,700
Electro Surgical Unit Ina Top	Gynaecology OPD	€ 7,000	BDT 729,300	BDT 743,300
Electro Surgical Unit, 100w	Surgery OPD 07	€ 3,000	BDT 275,400	BDT 292,000
Electro-encephalography (EEG)	Neuro-surgery OPD	€ 22,400	BDT 2,056,300	BDT 2,180,100
Electro myography (EMG)	Neuro-surgery OPD	€ 34,000	BDT 3,060,000	BDT 3,309,100
Electro Surgical Unit, 400 W, vessel sealing and Argon Plasma Unit	Thoreac Surgery-OT	€ 29,600	BDT 2,564,000	BDT 2,680,800

Annex A. The Prices

Electro Surgical Unit, 400 W, vessel sealing, TURP	\$ 39,300	BDT 3,146,000	BDT 3,206,900	BDT 3,366,300	BDT 3,175,400	BDT 3,238,900	BDT 3,400,000	A

ANNEX - B
SPECIFICATION

OT Complex (Common)

OT Table, Electro-Hydraulic, manual over-ride

- All movements by Electro-hydraulic technology, including Manuel over ride
- Sliding table top - 300 mm, Return to 0 position (automatic leveling), Continuous X-ray tunnel from head to foot end, Safe working load: minimum 400 kg
- Hand switch + Second operating panel on the column
- Provision to attach Orthopedic attachment and Neuro attachment
- Including standard accessories

OT Light,Ceiling, LED, double dome

- Illumination 160,000 Lux + 160,000 Lux at 1 meter,
- 3 colors temperature between 3,500K to 5,000K
- 50,000 hours LED life
- CE or FDA

OT Light,Ceiling, LED, double dome, tri color, camera

- Illumination 160,000 Lux + 160,000 Lux at 1 meter,
- 3 colors temperature between 3,500K to 5,000K
- 50,000 hours LED life
- HD camcra unit - 2.1 MPixel, full HD 1080p, total minimum 120x (optical 10x zoom & digital 12x)
- Monitor : 24 inch color, TFT on arm from ceiling

OT Light,Singlearm, portable, with battery

- Illumination at distance of 1 m: 120,000 lux
- LED, Colour temperature: 4,000K, life 20,000hr
- Battery for 2 hour back up

Electro-Surgical Unit,400 W, Bipolar TURP, vessel sealing

- 400 watt Monopolar, 350W bipolar outputs.
- 9 inches colouredtouchscreen, 5 outputs (2 monopolar and 3 Bipolar)
- Simultaneous activation of 2 monopolar outputs and also two bipolar outputs
- TURP, Vessel sealing, Argon/gastro software
- Auto detection of connected instruments with corresponding settings
- Connection of a Double pedal and a single pedal foot switches simultaneously
- *Standard accessories of the equipment, TURP and vessel sealing*

Electro-Surgical Unit, 300 W

- 300 watt Monopolar, 120W bipolar
- 3 outputs (2 monopolar+1 Bipolar)
- *Gastro Cut, monopolar resection, argon connectivity*
- *Standard accessories.*

SuctionMachine, electric

- On trolley, Vacuum 0- 650mmHg, 50 Litter/min
- Bottle capacity: 2 x 4000ml (4000cc + 4000cc)

Monitor, vital sign

- PR, SPO2 and NIBP, 7 inch monitor, 8 hours back up
- Standard accessories

Stool, revolving, Height adjustable

mobile on 5 castors (double swivel type, 62mm dia) with central brake –activated by foot, adjustable Seat height by gas spring with foot activation,

Trolley, Mayo's

Adjustable heightss table by foot pump from 900-1300mm for use near and over the surgical site.

Anesthesia Machine with ventilator

- Trolley with 3x Drawers
- 2x Vaporizers (Halothane / Isoflurane/ Sevoflurane)
- Ventilator modes : IMV, S-IMV, PCV, S-PCV, PSV, VTG, Manual respiration /spontaneous mode,
- 15.0" inch color TFT monitor, Touch screen, High frequency 3 to 80 l/min, Tidal Volume 3-600 ml suitable for neonate to adult
- Electronic rotameter
- 100 min backup

Anesthesia Machine with ventilator, 15inch, 2xvaporizer + Gas module + paramagnetic sensor

- Trolley with 3x Drawers
- 2x Vaporizers (Halothane / Isoflurane/ Sevoflurane)
- Ventilator modes : IMV, S-IMV, PCV, S-PCV, PSV, VTG, Manual respiration /spontaneous mode,
- 15.0" inch color TFT monitor, Touch screen, High frequency 3 to 80 l/min, Tidal Volume 3-600 ml suitable for neonate to adult
- Paramagnetic O2 sensor, Electronic rotameter, Multi gas analyzer with agent ID- of 5 anesthetic gases
- 100 min. power backup

Laryngoscope, fibre-optic,with all blade sizes

Stainless steel body and blades, 5 Macintosh blades, f/o

DUODENOSCOPE, VIDEO with ERCP set:

Comprising following -

- VIDEO IMAGING SYSTEM (CAMERA + LED LIGHT SOURCE)
- DUDENO VIDEOSCOPE
- 26 inch full HD LCD MONITOR
- Leak Tester:
- Printing System:
- Trolley: 04 Shelves, 1 Drawer, 1 Key Board Tray, Scope & Instruments Holder
- Standard ERCP accessories
- DIATHERMY WITH ARGON unit:300W, 2 monopolar and 1 bipolar outputs; Gastro Cut software for gastroenterology: Polypectomy&Papillotomy and endoscopic resections with loops or knife electrodes. Power adjustable in "slow", "medium" and "fast"

CUSA, Set (Ultrasonic Surgical Aspirator):

Frequency: 23 kHz and 36 kHz, handpiece recognition via one output

Aspiration: Up to 26 in. Hg vacuum

Irrigation rate: 1 to 29 cc/min.

With standard accessories

COLONOSCOPE set, VIDEO

Note: the processor/camera, light source, workstation etc. of Duodenoscope can be used with this Colonoscope(no need to purchase again).

Ultrasonic Desiccator (Lotus LG4/Harmonic Scalpel / Enceal)

Comprising Ultrasonic Desiccator and Diathermy with vessel sealing

(A) Ultrasonic surgical Scalpel for Cutting and coagulation

- The energy generated in a transverse direction (90 degree) to reduce energy-scattering loss
- Large TFT screen to show all the parameters, power display, transducer status etc.
- Simultaneous current-free cutting and coagulation
- Life time of each transducer must be minimum 250 minutes in operation
- 180mm Hand piece, disposable - 10 pcs & Transducer, reusable – 1 pc
- 420mm Handpiece, disposable - 10 pcs, Transducer, reusable – 1 pc

<p>(B) Bipolar Diathermy with VESSEL sealing & Bipolar TURP sealing</p> <ul style="list-style-type: none"> ▪ 350 watt Monopolar, 350W bipolar outputs. ▪ 4 outputs (2 monopolar and 2 Bipolar) ▪ TURP, Vessel sealing, Argon software ▪ Auto detection of connected instruments with corresponding settings ▪ <i>Standard accessories.</i>
<p>Nebulizer, ultrasonic, Nebulization capacity: up to 4ml/minute or above</p>
<p>HD video monitoring with recording system, two monitors</p> <ul style="list-style-type: none"> ▪ High Definition 3 CCD camera ▪ LED Light source : 6500 degK, 20,000 hour LED life ▪ 24-inch medical grade monitor, resolution (1920x1200)
<p>Laparoscope, adult, with Surgical accessories Laparoscope 10 mm 30° autoclavable, working length 330 mm with all accessories (detailed in SCMP) Suction and Irrigation unit for Laparoscopy Insufflator , 30L/Min Trolley from same manufacturer with isolation transformer High Definition 3 CCD camera LED Light source : 6500 degK, 20,000 hour LED life 24-inch medical grade monitor, resolution (1920x1200)</p>
<p>Laparoscope, adult, with Gynae accessories Laparoscope 10 mm 0° & 10 mm 30° - 1pc each including all instruments & accessories (detail- SCMP) Suction and Irrigation unit for Laparoscopy Insufflator , 30L/Min Trolley from same manufacturer with isolation transformer High Definition 3 CCD camera LED Light source : 6500 degK, 20,000 hour LED life 24-inch medical grade monitor, resolution (1920x1200)</p>
<p>Defibrillator, External, Automated</p> <ul style="list-style-type: none"> ▪ Biphase AED up to 360 Joules., ECG, 5.5 inch display
<p>Blood Warmer</p> <ul style="list-style-type: none"> ▪ 3 temperatures between 39-43 deg C ▪ heated jacket of 125-130cm
<p>OT Table, Electro-Hydraulic with manual over-ride with neuro attachment</p> <ul style="list-style-type: none"> ▪ All movements by Electro-hydraulic technology, including Manuel over ride ▪ Sliding table top - 300 mm, Return to 0 position (automatic leveling), Continuous X-ray tunnel from head to foot end, Safe working load: minimum 400 kg ▪ Hand switch + Second operating panel on the column ▪ Standard accessories + Neuro attachment
<p>OT Table, Powered, with neuro attachment Features:</p> <ul style="list-style-type: none"> ▪ All movements powered, Sliding table top - 300 mm, Return to 0 position (automatic leveling), Continuous X-ray tunnel from head to foot end, Safe working load: minimum 250 kg ▪ Hand switch + Second operating panel on the column ▪ Standard accessories + Neuro attachment
<p>Electro-Surgical Unit, 300W with NON-STICK forceps for Neuro surgery</p> <ul style="list-style-type: none"> ▪ 300 watt Monopolar, 120W bipolar ▪ 3 outputs (2 monopolar +1 Bipolar) ▪ <i>Gastro Cut, monopolar resection, argon connectivity</i> ▪ <i>Standard accessories + non-stick bipolar forceps – 4 pcs of different sizes</i>

Monitor, Multi-parameter, IBP, NIBP, etCo2 & temperature

Modular type (Pre configured type will not be acceptable), 15 inch TFT

C-Arm Machine, 25kw, FPD 30X30 for Neuro

25KW, 300KHU tube, Amorphous Silicon FPD 30x30, 1.5kX1.5K camera, 2x27 inch Medical grade monitors on trolley, Minimum 200,000 image storage
CE or US-FDA certified

C-Arm Machine, 25kw, II for Neuro

25KW, 300KHU tube, II 9 inch, 1kX1K camera, 2x27 inch Medical grade monitors on trolley, Minimum 200,000 image storage
CE or US-FDA certified

Microscope, Operating for Neurosurgery

Overall composition of the operating Microscope:

- Microscope Body: 01 set.
- Observation tubes: 02 sets
- Eyepieces: 02 sets
- Objectives: 01 set
- Illumination: 01 set
- Floor stand : 01 set
- Foot control panel: 01 set
- Stereoscopic Observer (Face to Face): 01 sets (Optional)
- Accessories: 01 set

Craniotome, Set

Brushless, Dual-Motor-System Power Tool, High-Speed 80'000 rpm, two motor connections to connect and run two hand pieces

OT Table, Electro-Hydraulic with manual over-ride with Orthopedic attachment

- All movements by Electro-hydraulic technology, including Manuel over ride
- Sliding table top - 300 mm, Return to 0 position (automatic leveling), Continuous X-ray tunnel from head to foot end, Safe working load: minimum 400 kg
- Hand switch + Second operating panel on the column
- Standard accessories + Orthopedic attachment

Electro-Surgical Unit, 400w for Orthopedic

- 400 watt Monopolar, 350W bipolar outputs.
- 9 inches coloured touch screen, 5 outputs (2 monopolar and 3 Bipolar)
- Simultaneous activation of 2 monopolar outputs and also two bipolar outputs
- Vessel sealing, Argon/gastro software
- Auto detection of connected instruments with corresponding settings
- *Standard accessories*

Quality Standard: CE or FDA certificate of the offered item must be submitted with the offer

C-Arm Machine, 5kw, 9" Image Intensifier for Orthopedic

5KW, 200KHU tube, II 9 inch, 1kX1K camera, 2x26 inch Medical grade monitors on trolley, Minimum 3,000 image storage
CE or US-FDA certified

Arthroscopy Set

Endoscope 4.0 mm / 0° & 30°wide angle, 175 mm working length, autoclavable -1pc each with all instruments and accessories detailed in SCMP

Arthroscopy Pump

Trolley from same manufacturer with isolation transformer

High Definition 3 CCD camera

Xenon Light source 180w

24-inch medical grade monitor, resolution (1920x1200)

<p>Cystoscope, Adult, rigid, with accessories Cystoscope/hysteroscope 4 mm/12°, working length 300 mm autoclavable incl. sheath, working element, biopsy forceps and grasping forceps</p>
<p>Cystoscope, Pediatric, rigid, with accessories Mini Cystoscope, autoclavable, 2,0 mm, 0°, WL 187 mm incl sheath, forceps, needles etc.</p>
<p><u>Cystoscope, Adult, flexible, with accessories (VIDEO SYSTEM)</u> Video system center Xenon light source, 300watt Hd camera head Cysto-nephrovideoscope High definition lcd monitor, 26 inch</p>

<p>Uretero-roscope, semi-rigid, long, adult, with accessories</p> <ul style="list-style-type: none"> - Uretero-Renoscope "HD" 6°, autoclavable, 425mm, HD technology. 40.000 Pixel - Instrument channel- 1 x 6 Ch or 2 x 3 Ch - Biopsy forceps flexible, Grasping forceps flexible, 5 ch., Scissors flexible 5 ch.,
<p>Uretero-roscope, semi-rigid, short, adult, with accessories</p> <ul style="list-style-type: none"> - Uretero-Renoscope "HD" 6°, autoclavable, 315mm, HD technology. 40.000 Pixel - Instrument channel- 1 x 6 Ch or 2 x 3 Ch - Biopsy forceps flexible, Grasping forceps flexible, 5 ch. , Scissors flexible 5 ch., Working Length 315 mm.,
<p>Uretero-roscope, semi-rigid, Pediatrics, with accessories Uretero-Renoscope, 4 Fr., 6°, autoclavable, 2 lateral irrigation ports and 1 working channel, fiber optic light transmission should be incorporated Grasping Forceps for stone fragments, double action jaws, compatible</p>
<p>Urethrotome, Otis, parallel expanding, length of dilating surface 16cm, with 2 knives</p>
<p>Lithotripter, Pneumatic, with accessories</p>

- Sealed, autoclavable pneumatic handpiece with 3 m compressed air connection tube
- Selection of lower and higher impulse frequency range, depending on stone size
- Double foot pedal
- Suction system for simultaneous evacuation of stone fragments and better fragmentation control in kidney, ureter, bladder which reduces stone push back
- Output energy: minimum 85 mj
- Multiple impulse frequency adjustable between 1-12 Hz by 1 Hz

The system should consist of

- Control unit
- Electrical foot pedal
- Pneumatic Hand piece kit – 1 set
- Probes of 4 pcs
- Cordless and portable lithotripter
 - Battery operated, rechargeable battery, 800mAh
 - Energy output : minimum 85mJ, Operating mode : +/- 3 Hz

Lithotripter, ultrasonic With accessories

- Ultrasonic and Pneumatic combination lithotripter for faster and safer removal particularly of large stone burdens
- Separate application of pneumatic or ultrasonic lithotripsy & suction as well as simultaneous application
- Control of pneumatic & ultrasonic lithotripsy and suction via one foot twin pedal.
- Mode of operation: Continuous operation
- Output energy: Ultrasonic up to minimum 75W and Pneumatic up to minimum 85 mj
- Ultrasonic frequency : 24 - 26 kHz, Pneumatic pulse rate adjustable between 1 – 12 Hz (single Hz increments) or single impulse release
- **Ultrasonic Lithotripter**
 - Controlled suction because of integrated peristaltic valve
 - Effective suction and disintegration of soft stones and stone fragments
 - Faster stone clearance – less blockage
 - * Optimized fragment transport through dedicated suction connectors
 - * Enhanced ultrasound effectiveness
 - Ultrasonic probe sizes and length: 3.8 / 3.3 mm dia., length 403 and 330mm
 - Miniperc ultrasonic probe, compatible with mini nephroscopes / pediatric nephroscopes with =>6 Fr- working channel.
 - Long-lasting ultrasound probes
- **Pneumatic Lithotripter technology**
 - ballistic principle
 - Reduced probe displacement which ensures less push-back & greater fragmentation control
- **Suction System**
 - Offers simultaneous suction and lithotripsy not only for kidney and bladder but also for the ureter.
 - Pneumatic handpiece can be connected via quick coupling mechanism within seconds either with the ultrasound hand piece or with the suction system.
 - Ultrasound Hand piece kit – 1 set
 - Ultrasonic Probes of following specifications or equivalent,
 - Pneumatic Hand piece kit
 - Pneumatic Probes of following specifications or equivalent, compatible for
 - Combination Probe for Pneumatic & Ultrasonic:
 - Compressors & Tubing

- Suction kits
- **Cordless and portable lithotripter**
 - Battery operated, rechargeable battery, 800mAh
 - Energy output : minimum 85mJ, Operating mode : +/- 3 Hz

Lithotripter, Pneumatic & ultrasonic combined with accessories

Features :

- Ultrasonic and Pneumatic combination lithotripter for faster and safer removal particularly of large stone burdens
- Separate application of pneumatic or ultrasonic lithotripsy & suction as well as simultaneous application
- Control of pneumatic & ultrasonic lithotripsy and suction via one foot twin pedal.
- Mode of operation: Continuous operation
- Output energy: Ultrasonic up to minimum 75W and Pneumatic up to minimum 85 mj
- Ultrasonic frequency : 24 - 26 kHz, Pneumatic pulse rate adjustable between 1 – 12 Hz (single Hz increments) or single impulse release
- **Ultrasonic Lithotripter**
 - Controlled suction because of integrated peristaltic valve
 - Effective suction and disintegration of soft stones and stone fragments
 - Faster stone clearance – less blockage
 - * Optimized fragment transport through dedicated suction connectors
 - * Enhanced ultrasound effectiveness
 - Ultrasonic probe sizes and length: 3.8 / 3.3 mm dia., length 403 and 330mm
 - Miniperc ultrasonic probe, compatible with mini nephroscopes / pediatric nephroscopes with =>6 Fr- working channel.
 - Long-lasting ultrasound probes
- **Pneumatic Lithotripter technology**
 - ballistic principle
 - Reduced probe displacement which ensures less push-back & greater fragmentation control
- **Suction System**
 - Offers simultaneous suction and lithotripsy not only for kidney and bladder but also for the ureter.
 - Pneumatic handpiece can be connected via quick coupling mechanism within seconds either with the ultrasound hand piece or with the suction system.
 - Ultrasound Hand piece kit – 1 set
 - Ultrasonic Probes of following specifications or equivalent,
 - Pneumatic Hand piece kit
 - Pneumatic Probes of following specifications or equivalent, compatible for
 - Combination Probe for Pneumatic & Ultrasonic:
 - Compressors & Tubing
 - Suction kits
 - **Cordless and portable lithotripter**
 - Battery operated, rechargeable battery, 800mAh
 - Energy output : minimum 85mJ, Operating mode : +/- 3 Hz

Lithotripter, laser, with accessories

- Holmium YAG Laser system , Wavelength : 2.1 μ m, Output power : Up to 35 W, Repetition rate : from 3 to 30 Hz, Energy per pulse : from 0.2 to minimum 5 J, With different laser fibre probes

C- Arm Machine for Urology

25KW, 300KHU tube, 11 9 inch, 1kX1K camera, 2x27 inch Medical grade monitors on trolley,
Minimum 200,000 image storage

Product quality certificate : Valid CE or US-FDA certificate must be submitted

Table, C-Arm compatible for Urology

- All movements by Electro-hydraulic technology, including Manuel over ride
- Sliding table top - 300 mm, Return to 0 position (automatic leveling), Continuous X-ray tunnel from head to foot end, Safe working load: minimum 400 kg
- Hand switch + Second operating panel on the column
- Provision to attach Orthopedic attachment and Neuro attachment
- Including standard accessories

Laser, YAG, Holmium/Thulium, urology**200W Thulium with Standard accessories**

For BPH - Benign Prostatic Hyperplasia (TuVAP - TuVARP - TuLEP - TuVEP)

- Enucleation
- Vapo - Enucleation
- Vapo - Resection
- Vaporization
- Wavelength : 2010 nm
- Power : Up to 200W
- Power setting: 1 W to 200 W in 1, 2, 5 W increment steps

PCNL (Percutaneous Nephroscope) with accessories

- Nephroscope 0° with Parallel view, Working Length 250 mm, Integrated Fibre Optic Light Cable, Autoclavable, Working Channel 4.9+ mm. – 1pc
- Nephroscope Sheath, WL 250 mm continuous irrigation, without perforation, with obturator. -- 1pc
- Telescoping dilation set, 9-24 ch, consisting of 6 dilators with Irigid and 1 flexible guide probe. – 1pc
- Biopsy forceps& grasping forceps of diffent sizes.

Laparoscopic set, urology

- Laparoscope 10 mm 0° & 30° autoclavable, working length 330 mm, 1pc each
- Veress insufflations needle 2.0 mm, length 120 mm, 1pc
- Automatic trocar set 5.5 mm & 11 mm and Reducer 11 mm - 5.5 mm
- Doplhin dissecting and grasping forceps rotatable, detachable - 1pc
- Maryland dissector, 5 mm, 33 cm, rotatable, detachable, complete
- Heavy duty (fundus) grasping forceps,5 mm, 33 cm, rotatable, detachable, complete set
- Grasping forceps, 5 mm, 33 cm, rotatable, detachable, complete set
- Metzenbaum scissors, 5 mm, 33 cm, rotatable, detachable, straight complete set
- Babcock grasping forceps, 5 mm, 33 cm, rotatable, detachable, complete set
- Hunter bowl grasping forceps,5 mm, 33 cm, rotatable, detachable, complete set
- Alpha-bipolar grasping forceps, curved, fenestrated, delicate,5 mm, 34 cm, complete set
- HF-right- angle-electrode monopolar, w. Lateral suction/flush-port 34 cm. - 1pc
- HF-suction/irrigation tube, monopolar, 5 mm, working length 340 mm- 1pc
- "CULLIS" suction/irrigation instrument,
- Clip applying forceps, "TC" endo needle holder, Shedid knot-tightener, Endo-retractor,

Suction and Irrigation unit for Laparoscopy

Insufflator , 30L/Min

High Definition 3 CCD camera

LED Light source : 6500 degK, 20,000 hour LED life
24-inch medical grade monitor, resolution (1920x1200)
Trolley from same manufacturer with isolation transformer

ESWL (Extra-corporeal Shock wave lithotripter) with accessories

- Piezoelectric/ElectroMagnetic Shock Wave technology
- Dual simultaneous real time localization as a mean of the safest way to locate stones. To allow the users to carry out ultrasound and X-ray localization either simultaneously and also separately.
- **Triple focus:** Piezo-electric self focusing spherical cup, Double layer technology / ElectroMagnetic technology
- SW Guaranty Lifetime of a single transducer : minimum 5.0 million shocks

The ESWL system should consist of

1. **Shock wave therapy unit**
2. **Control Panel**
3. **Color Ultrasonogram unit**
4. **C-arm X-ray machine with fixation**
5. **Universal Table with endo-uro accessories**
6. **Accessories to be supplied**
7. **Room renovation and other responsibilities**

Quality Standard: CE or FDA certificate of the offered item must be submitted with the offer

Electrosurgical Machine, 400W; Bipolar TUR, vessel sealing

- 400 watt Monopolar, 350W bipolar outputs.
- 9 inches coloured touchscreen, 5 outputs (2 monopolar and 3 Bipolar)
- Simultaneous activation of 2 monopolar outputs and also two bipolar outputs
- TURP, Vessel sealing, Argon/gastro software and accessories
- Auto detection of connected instruments with corresponding settings
- *Standard accessories + Vessel sealing accessories + Bipolar TURP set*

Bipolar Resection set:

- Cystoscope, autoclavable, 4.0 mm, 30°, working length 302 mm - 1 pc
- Bipolar working element large, passive, click system, for optic 4mm - 1 pc
- Inner sheath for Resectoscope 24/26ch., rotatable, click/click - 1 pc
- Continuous-flow outer sheath for Resectoscope 26fr./charr., rotatable - 1 pc
- Standard obturator 24/26 ch, click - 1 pc
- Bipolar knife electrode, loop electrode, ball electrode - 5 pcs each size

Ultrasonic Dessicator (Lotus LG4/Harmonic Scalpel / Enceal)

(please see in the Standby OT)

EYE surgery

Electro-Surgical Unit, 400 W, vessel sealing and Argon Plasma Unit for Thoracic surgery

Electro-Surgical Unit

- 400 watt Monopolar, 350W bipolar outputs.
- 9 inches coloured touch screen, 5 outputs (2 monopolar and 3 Bipolar)
- Simultaneous activation of 2 monopolar outputs and also two bipolar outputs
- TURP, Vessel sealing, Argon/gastro software
- Auto detection of connected instruments with corresponding settings
- Connection of a Double pedal and a single pedal footswitches simultaneously
- Plasma Argon System- FLEX & PULSED
- *Standard accessories for equipment, vessel sealing, flexible scopes and rigid endoscopes*

CE or US-FDA certified

VIDEO BRONCHOSCOPE

Consisting of

- A. VIDEO IMAGING SYSTEM (CAMERA + LIGHT SOURCE)
- B. BRONCHOVIDEOSCOPE
- C. HIGH DEFINITION LCD MONITOR
- D. Printing System :

Esophagoscope, rigid and flexible

Straight Forward Telescope 0°, diameter 5.5 mm, length 53cm,

Operating Esophagoscope

Including different types of forceps

Centrifuge, 12 holes 12x15ml angle rotor, 4000 rmp,
Tube Sealer RF technology, Multi clamp, 4 clamps, Bench top sealer for Blood bag PVC tubes, Handgun connectivity, Sealing PVC tubing medical degree up to 5.0 mm OD.
Microscope, Binocular
Blood Warmer Suitable for transfusion of blood, plasma and with warming warming up to 41 degree C, increment 0.5 degree C, Warmed jacket in which the standard infusion (blood, plasma etc.)
Bath, Plasma Thawing For Thawing and warming of Blood, plasma, thawing out stem cells etc.; Temperature setting: +37 to max. +40 °C; Capacity 4 bags
Water Bath, Digital 9 Lt, digital control ambient +5°C to 100°C
Oven, Hot Air, 50 Liter Microprocessor controlled, integrated digital timer, ambient+5 °C to +220 °C
Incubator, 50 Liter Ambient +5 °C to +70 °C
Platelate Shaker with incubator Temperature Range from 20°C to 35°C, Sensitivity : 0.1°C or less; 300 litres, Two agitators for total 100 bags in the incubator, Shaking speed 50-60 strokes per minute
Laminar Flow Int. Dim. (W x D x H) : 1195 x 630 x 620mm approx. HEPA filter with 99.999% efficiency for particles _ 0.3 µm
Manual Plasma Expresser
Hand Clipper Tube sealer & cutter, battery operated
Autoclave, Lab, 50 Liter Microprocessor controlled, steam sterilizer, built in programs
Digital Centrifuge

16x15ml, 4000rpm
Balance, Digital, 1gm-1500gm
Analyzer, Cell Counter 3 part, 18 parameters
Donor's Chair Height adjustment by motor, manually adjustable foot rest, Reading lamp Central operating brake, IV pole
ELISA Machine Reader, washer and shaker
Infusion pump Total volume range: 1 to 999.9 ml
Auto cell expresser: Microprocessor controlled, Fully programmable Automatic blood components extractor, electronic presses, integrated scale, electronic Secondary press, auto calibration to Zero at any new separation, 3 integrated scales to weight all bags content, 5programmable sealing clamps, Separation time : approx 90 secs for a conventional quadruple bag and approx 150 secs for a T&B quadruple bag
Blood Bag Striper Battery operated, hand Held sealer for 5mmOD blood bag tube, RF generator, 800 sealing with one charge, .
Cryo-refrigerator 16 litre, Temperature range: from +30°C to -180°C
ECG Machine, 3 channel 4inch display, 12 lead ECG, +built-in printer+ std accessories
ECG Machine, 12 channel 8 inch display, 12 lead ECG, + built in printer, alphaneumaric keyboard+ std accessories
Echocardiogram with Color Doppler 19" LCD Color Monitor, Scan Method - Linear Scan, Convex Scan, Trapezoid Scan, Sector ; Scanning Depth 40 cm; Including 1 Pce Sector Transducer , 2 to 5 MHz for Adult Cardiac 1 Pce Sector Transducer , 3 to6 MHz for Pediatric Cardiac 1 Pce. Linear Transducer , 4 to 11MHz for Vascular Digital Video Printer with 10 Roll Printing Paper Ink Jet Color printer (High Quality)
Treadmill (ETT) Medical purpose , Speed range: 0,5 – 20 km/h, increments of 0.1 km/h Emergency stop button
Echocardiogram; Trans-esophageal 19" LCD Color Monitor, Scan Method - Linear Scan, Convex Scan, Trapezoid Scan, Sector ; Scanning Depth 40 cm; Including 1 Pce Sector Transducer , 2 to 5 MHz for Adult Cardiac 1 Pce Sector Transducer , 3 to6 MHz for Pediatric Cardiac

<p>1 Pce. Linear Transducer , 4 to 11MHz for Vascular 1 Pce TEE Transducer , 2 to 8 Mhz for Adult Cardiac (TEE) Digital Video Printer with 10 Roll Printing Paper Ink Jet Color printer (High Quality)</p>
<p>Echocardiogram; 4D with Color Doppler Sector Scan, Linear Scan, Trapezoid scan; Scanning Depth 40 cm; Built in Cardiac 4D Including Volume Sector Transducer for 4D Cardiac , 2 to 4.0 MHz - 1 No Sector Transducer , 2.0 to 4.0 MHz for Adult Cardiac - 1 No Sector Transducer , 4 .0 to 9.0 MHz for Pediatric Cardiac - 1 No Linear Transducer 5.0 to 11.0 MHz for PV & Small parts - 1 No. Multiplane TEE Transducer , 3.0 to 6.5 MHz for Cardiac - 1 no. B/W Digital Video Printer with 10 Roll Printing Paper Color Digital Video Printer with 10 Roll Printing Paper Color Laser Printer with 500 sheet printing paper</p>
<p>Monitor, Holter PC based system, 4xholter recorders + accessories & computer</p>
<p>Cath Lab ceiling mounted, flat panel 100KW/3.0 MHU FPD (8 Inch x 8 Inch), 2.6 lp/mm, Pixel 190 micro meter, Workstation with Imaging software, Image memory, 2x 19" HR LCD monitor, Patient table, Pressure Injector for contrast injection, UPS + other necessary accessories.</p>
<p>Cath Lab Floor mounted, flat panel 100KW/3.0 MHU FPD (8 Inch x 8 Inch), 2.6 lp/mm, Pixel 190 micro meter, Workstation with Imaging software, Image memory, 2x 19" HR LCD monitor, Patient table Pressure Injector for contrast injection, UPS + other necessary accessories</p>
<p>C-Arm with fluoroscopy 25KW, 300KHU tube, Amorphous Silicon FPD 30x30, 1.5kX1.5K camera, 2x27 inch Medical grade monitors on trolley, Minimum 200,000 image storage Product quality certificate : Valid CE or US-FDA certificate must be submitted</p>
<p>Echocardiogram, Doppler, Vascular 19" LCD Color Monitor, Scan Method - Linear Scan, Convex Scan, Trapezoid Scan, Sector ; Scanning Depth 40 cm; Including 1 Pce Sector Transducer , 2 to 5 MHz for Adult Cardiac 1 Pce. Linear Transducer , 5 to 14MHz for Vascular & Smal Parts B/W Digital Video Printer with 10 Roll Printing Paper</p>
<p>ECG Machine, 12 Channel 8 inch display, 12 lead ECG, + built in printer, alphaneumaric keyboard+ std accessories</p>
<p>Monitor, Patient (ECG, NIBP, SPO₂) Modular, 12 inch + ECG, NIBP, SPO₂& TEMP, std accessories</p>
<p>Defibrillator, External, Automated</p>

5 inch monitor, AED, biphasic, up to 180 jule, ECG, Reusable adult electrodes – 1 pair, ECG cable
Echocardiogram, Portable Laptop model (portable), 15” LCD Monitor, Scan Method - Linear Scan, Convex Scan, Trapezoid Scan, Sector ; Scanning Depth 40 cm; Including 1 Pce Sector Transducer , 2 to 5 MHz for Adult Cardiac 1 Pce Sector Transducer , 3 to6 MHz for Pediatric Cardiac 1 Pce. Linear Transducer , 4 to 11MHz for Vascular Digital Video Printer with 10 Roll Printing Paper Ink Jet Color printer (High Quality)
Syringe Pump commonly available branded syringe of 10, 20 and 50 ml , Volume limit: 0.1 to 999.9 ml
Ventilator, ICU 18 inch TFT, Patient group Adults, Children, Infants Tidal Volume: 10-4000 ml <ul style="list-style-type: none"> ▪ Ventilation modes: <ul style="list-style-type: none"> - Volume controlled Ventilation modes : VCV, VC-SIMV - Pressure controlled ventilation modes: PCV, PC-SIMV, Bilevel, BiLevelST, Mand.BiLevel, PSV, PC-APRV, CPAP, SPONT, NIV, Apnoea - Mixed/Hybrid ventilation mode : Dyn-BiLevel, Dyn-BiLevel ST - Breathing therapy : High Flow Oxygen Therapy (HFOT) for nasal CPAP ▪ Battery backup 3hours
Monitor, Cardiac 14 inch, Modular; ECG/RESPM, SpO2, NIBP, TEMP, IBP, ETCO2, built in printer + standard accessories
Refrigerator, Medicine 600 Ltr , shelf: 10 nos, Glass Door.
Central Monitor, 8 beds Central workstation & software Monitor, Cardiac – 8 pcs 14 inch, Modular; ECG/RESPM, SpO2, NIBP, TEMP, IBP, ETCO2, CO2, built in printer + standard accessories
Analyzer , Chemistry, Fully Automated Throughput : 400T/hrs with ISE 150 tests/hr
Analyzer , Chemistry, Semi Auto
Analyzer , Coagulation , Auto 4-channel, Parameters to be measured : PT, APTT, Fibrinogen, Thrombin time, Reptilase time, Factors (II, V, VII, VIII, IX, X, XI, XII) , Anti-Xa Heparin assays, Protein C, Protein S, Lupus Anticoagulants assays
Analyzer , Blood Gas, Auto Po2,PCo2,PH, serum lactate
Analyzer , Electrolyte Analyzer, Auto Na, K, Cl, Ca,

Analyzer , ESR, Auto Capacity : 20 samples at a time
Analyzer , HbA1c (Glycated Hemoglobin) HPLC principle
Analyzer , Haematology, 5 Part including Reticuloryte count and Fluid Cytology, Auto
Fully Automated Immunoassay minimum 120 tests/hour
Centrifuge, 30 Hole, Swing Rotor Maximum speed : 4,000 rpm Capacity : Swing-out Rotor 30 x 1.5/2 ml
Centrifuge, 18 holes Fixed Rotor Maximum speed : 4,000 rpm Capacity : Swing-out Rotor 16-18 x 15ml
Colorimeter Digital/Manual Bench top digital colorimeter Wave length: 400-700 nm, 6 filters
pH meter Digital bench top pH meter pH range 0.00 to 14.00 pH/ Resolution 0.01 pH
Microscope, Binocular, Laboratory
Microscope, Binocular with Phase contrast, Polarizing and Dark field
Bio-Safety Cabinet , Class-2 4 feet with Support stand, UV light, electrical out let Usable work area : minimum 0.6 m ² /6.5 sq ft ULPA Filter Typical Efficiency : >99.9995% at 0.1 to 0.3 microns Fluorescent Lamp : > 1400 Lux
Autoclave, 50 Liters, Bench-top Microprocessor controlled, steam sterilizer, built in programs
Distilled Water Plant 4 liter per hour, Bacteria, & Gas free water. Heating element is made of fully silica & sheathed
Incubator, Lab, 50 Liter Temperature ambient +5° C to 99,9°C Digital displays for temperature and time
Oven, Hot Air, 50 Liter Microprocessor controlled, integrated digital timer, ambient+5 °C to +220 °C
Balance, Analytical, Digital, (0.1mg to 200g) Calibration: Automatic, Readability : 0.0001 gm or less
Shaker speed of 60 to 200 rpm Electronic with timer, auto stop function, memory function
Vortex Mixer Speed from 0-3000rpm

Centrifuge, Cyto 4000 rpm, cyto rotor6-8 slide carriers with cyto accessories
Cryostat with accessories 2 to 42 microns in 2 micron increments Ambient to -30°C in 1°C increments
Microtome, Automatic With motorized fine advance handwheel for independent automated or manual cutting stroke. Moveable handle for effortless conversion from manual to motorized;
Paraffin Dispenser Paraffin Dispenser, microprocessor controlled, 6.25 gallon capacity w/heated non-drip spigot, lexan lid, built-in clock, ambient to 65°C.
Slide Dryer , Hot Air forced air, holds 2 conventional slide stainer racks, overheat protection switch, ambient to 75°C.
Tissue Processor, Automatic Floor model, w/ color touch screen controller, 12 process program schedule: Including time, day, date, and name, programmable reagent management system, 4 (plus 1 reserve) paraffin bottles, 10 reagent, 2 purge, 2 charcoal filtration stations,
Tissue Processor, Microwave Microwave, dual magnetron, waveguides, range timer and air ports, color touch-screen, PID temperature control, PLC regulation of power (1200W) settings, time, temperature and ramp up rate, ventilated stainless steel cavity w/ceramic floor, adjustable air agitation; Includes: calibration container, 1pk temperature probe insulators, ventilation & agitation connecting accessories.
Tissue Floatation Bath Flotation Work Station, microprocessor controlled w/8" x 8" x 2 ¼" deep dish removable glass bowl w/built-in LED light array, 2" x 6" slide dryer and 2"x 2"
Tissue Embedding Center microprocessor controlled, 2-part design, includes a dispensing console and detached cold plate console. Low work surface, user friendly membrane switches, 5-liter paraffin reservoir, heated dispenser nozzle, heated work surfaces, heated forceps holders and a cold spot. Including separate heated compartments for molds and cassettes.
Incubator, Lab, 50 Liter Ambient +5 °C to +70 °C
Oven, Hot Air, 50 Liter Microprocessor controlled, integrated digital timer, ambient+5 °C to +220 °C
Bio-safety Cabinet Class 2 Int. Dim. (W x D x H) : 1195 x 630 x 620mm approx. HEPA filter with 99.999% efficiency for particles _ 0.3 µm
Bio-safety Laminar Flow Int. Dim. (W x D x H) : 1195 x 630 x 620mm approx. HEPA filter with 99.999% efficiency for particles _ 0.3 µm
Analyzer, Chemistry, automatic Random access, 300 tests/hr + 150 test/hr ISE
Analyzer, Chemistry, Semi-automatic
Analyzer, Electrolyte; Automatic

30 test/hr, Na, K, Cl, Ca
Analyzer, Urine Chemistry
Colorimeter, digital Bench top digital colorimeter Wave length: 400-700 nm, 6 filters
Analyzer, Hematology; Semi-automatic, 3 part
Analyzer, Hematology; Automatic 5 part
Fetal Doppler Bench top unit, operates on both AC & DC, displays HR of fetus
Ventilator, Transport Patient group Adults, Children, Infants Built-in Nabilizer , Built-in compressor or turbine type, Battery backup up to minimum 3 h, Touch-TFT Colored minimum 8.5" Screen Ventilation modes : PC-CMV, PC-SIMV, PC-ACV, spont. CPAP, CPAP backup, DUOPAP, O2 Therapy, VC-CMV, VC-SIMV , Modifications PSV, PRVC, ETT compensation Tidal volume (PRVC) : from 20 up to 1600 ml
Colposcope, video HD resolution camera with PC & software
Electro-encephalography (EEG) 64 channel, TPM Mapping, 2d/3d mapping
Electro-myography (EMG) 4 channel NCS (Nerve conduction study), EP (Evoked Potential), Auditory Evoked Potential, Visual Evoked Potentials:
Nerve Conduction Study (NCS) 4 channel EMG with NCS (Nerve conduction study), EP (Evoked Potential), Auditory Evoked Potential, Visual Evoked Potentials:
Radiant warmer
Phototherapy Machine LED type
Electric sucker , Pediatric
Pulse Oxy meter (Pediatric sensor) 5 inch, SPO2 sensor for Pediatric – 2 sets
Apnea Monitor
Laryngoscope , Pediatric
ECG Machine 8 inch display, 12 lead ECG, + built in printer, alphaneumaric keyboard+ std accessories
Cardiac Monitor Modular, 12 inch + ECG, NIBP, SPO2& TEMP, std accessories
View Box for X-Ray Film
Pulse Oxy meter (Pediatric sensor)

5 inch, SPO2 sensor for Pediatric – 2 sets
ECG Machine 8 inch display, 12 lead ECG, + built in printer, alphanumeric keyboard+ std accessories
Cardiac Monitor Modular, 12 inch + ECG, NIBP, SPO2& TEMP, std accessories
X-Ray 1000 mA Digital Radiography (DR) 80KW, 400KHU tube, 2-FPD (CSI) connected 17x17inch, Floor mounted tube stand, 4 way table, stand bucky
X-Ray 500 mA Digital Radiography (DR) 50KW,300KHU tube, 2-FPD (CSI) connected17x17inch, Floor mounted tube stand, 4 way table, stand bucky
CR (Computed Radiography) Flat scan technology, Micron spot size 50 or less; 16 bit conversion
MRI (Magnetic Resonance Imaging), Super conducting, 1.5T or 3T
X-Ray 200-300 mA, Portable 30KW, 100KHU rotating anode tube
CT Scan; 128 slice
CT Scan; 64 slice
Bone Mineral Densitometer (BMD) DXA (Dual X-ray Absorptiometry), Scan type : Narrow fan beam Total body assessment, Body fat calculation, Calibration : LVA (Lateral Vertebra Assessment): Hip Analysis:
Ultrasound, 4D, color Doppler, 3 Probe 19" LCD Color Monitor, Scan Method - Linear Scan, Convex Scan, Trapezoid Scan, Sector ; Scanning Depth 40 cm; 4D Including 3 probes Digital Video Printer with 10 Roll Printing Paper Ink Jet Color printer (High Quality)
Ultrasonogram; color Doppler, Convex, Linear & Transvaginal Probe 19" LCD Color Monitor, Scan Method - Linear Scan, Convex Scan, Trapezoid Scan, Sector ; Scanning Depth 40 cm; Including Convex, Linear & Transvaginal Probe – 1 each Digital Video Printer with 10 Roll Printing Paper Ink Jet Color printer (High Quality)
Mammography FFDM with DBT
PET (Positron Emission Tomography) CT
Fibroscan :USG based & MRI based resuscitation unit For Liver fibrosis
Suction Apparatus Vacuum 0- 650mmHg, Bottle capacity: 2 x 4000ml (4000cc + 4000cc)
ECG Machine 6 Channel 8 inch display, 12 lead ECG, + built in printer, alphanumeric keyboard+ std accessories
Pulse Oxymeter

5 inch, SPO2 sensor for both adult and Pediatric – 1 set each
Pulse Oxymeter 5 inch, SPO2 sensor for both adult and Pediatric – 1 set each
Capnograph
Bronchoscope, Fiber-optic With light source Halogen 150w
Esophagoscope Different sizes and standard accessories
Child Bronchoscope Video camera&light source, video bronchoscope, HD monitor+Electrosurgical unit with Argon
Spirometer Lung function unit with PC and spirometry software
Sleep Study Machine <ul style="list-style-type: none"> • 40 channel, • Respiratory flow via thermistor and nasal cannula, respiratory rate • SpO2, pulse wave and pulse rate • Body position integrated in the patient box • Snoring • PAP pressure • Thoracic, abdominal respiratory effort (RIP) • Light channel • 6 x ECG, central heart rate • Systolic blood pressure, PTT • EMG Chin • 2 x EMG Leg • 6 x EEG • 2 x EOG • 8 x feed of analog signals
Proctoscope, With light source
Upper GI Endoscope, Video System Scope+video camera& processor with light source, Monitor, Image processing software
Gastroscope, Video with accessories Scope only
Duodenoscope, Video with accessories Scope +diathermy & Argon unit +C-arm
Colonscope, Video with accessories
Enteroscope, Double balloon
Duodenoscope, side view (ERCP) Scope + Diathermy (300w) & Argon
Fluoroscopy Machine C-arm, motorized, 5KW, 9 inch II, 200KHU rotating anode tube,
Bio-feedback Machine
ECT (Electro-convulsive Therapy) Machine ECT System including Headset, mains cable, stand,

cs lead.
Analyzer Electrolyte, Li 30 test/hr, Na, K, Cl, Li
Uroflowmetry Machine with accessories
Urodynamic Machine with accessories <ul style="list-style-type: none"> ▪ 22 inch high resolution TFT monitor ▪ Measurement programs and analyses according to ICS-Standard Cystometry, Urethra pressure profile, Pressure-flow measurement, Uroflowmetry, EMG recording , Animated biofeedback, Video Urodynamics (optional) <ul style="list-style-type: none"> ▪ Number of pressure channels: 4
Erectile dysfunction treatment unit, Linear Shockwave, Piezo electric type Linear shockwave, Piezo Electric technology, Probe to ensure 5.0mill shocks, Energy flux : from 0.125 to 0.16mJ/mm2 with frequency : 6-8Hz
Bladder scanner <ul style="list-style-type: none"> ▪ Uses Sector probe, 180deg, 2.35MHz
Fetal Doppler Bench top unit, operates on both AC & DC, displays HR of fetus
Suction Machine Vacuum 0- 650mmHg, Bottle capacity: 2 x 4000ml (4000cc + 4000cc)
Height & Weight Measuring Scale 120kg/250 Lb; Telescopic height rod, 600-2100mm with graduation 1mm
Ventilator, Portable Patient group Adults, Children, Infants Built-in Nabilizer , Built-in compressor or turbine type, Battery backup up to minimum 3 h, Touch-TFT Colored minimum 8.5" Screen Ventilation modes : PC-CMV, PC-SIMV, PC-ACV, spont. CPAP, CPAP backup, DUOPAP, O2 Therapy, VC-CMV, VC-SIMV , Modifications PSV, PRVC, ETT compensation Tidal volume (PRVC) : from 20 up to 1600 ml
Ventilator, Pediatric Dedicated for neonates & Infants neonates and Infants up to 30Kg HFO ventilation Built-in Nabilizer , Battery backup up to minimum 2 h, Touch-TFT Colored minimum 12" Screen Ventilation modes : IPPV , IMV, S-IPPV, S-IMV, S-IMV, S-IMV, S-IMV support or S-IPPV: PSV, CPAP, nCPAP, HFO Nasal Intermittent Positive Pressure Ventilation : nIPPV

তারিখঃ ১৩-০২-২০১৮ খ্রিঃ।

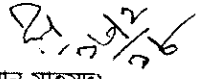

বিষয়ঃ Price Guide for Medical Equipment প্রিন্ট/প্রকাশের অনুমোদন।

সূত্রঃ MSH/SIAPS-BD/2018/414, Date: January 29.2018.

উপর্যুক্ত বিষয় ও সূত্রোক্ত পত্রের প্রেক্ষিতে Price Guide for Medical Equipment এর বিষয়ে পরিচালক, কেন্দ্রীয় ঔষধাগার (সিএমএসডি) এবং চীফ টেকনিক্যাল ম্যানেজার, নিমিউ এন্ড টিসি মতামত প্রদান করেন (কপি সংযুক্ত)।

এমতাবস্থায়, প্রস্তাবিত Price Guide for Medical Equipmentটি ১ম সংস্করণ হিসেবে প্রিন্ট/প্রকাশের জন্য নির্দেশক্রমে মন্ত্রণালয়ের সম্মতি জ্ঞাপন করা হলো।

সংযুক্ত: বর্ণনামতে

দৃষ্টি আকর্ষণঃ উপসচিব (ক্রয় ও সংগ্রহ অধিশাখা)।

বিষয়ঃ SIAPS/MSH এর প্রস্তুতকৃত Price Guide for Medical Equipment হালনাগাদ (Updated Version) সংক্রান্ত মতামত প্রদান প্রসঙ্গে।

সূত্রঃ ১। ৪৫.১৬৫.১২১.০১.০০.০০১.২০১৪-৩৭ তারিখঃ ০১.০২.২০১৮ইং
২। ৪৫.১৬৫.১২১.০১.০০.০০১.২০১৪-৩৩ তারিখঃ ২৯.০১.২০১৮ইং

উপর্যুক্ত বিষয় ও সূত্রস্থ স্মারকের প্রেক্ষিতে জানানো যাচ্ছে যে, SIAPS/MSH কর্তৃক দাখিলকৃত Price Guide for Medical Equipment (Updated Version) টি Randomly পর্যবেক্ষণ করা হয়। উক্ত Price Guide টি ১ম সংস্করণ হিসেবে ব্যবহারযোগ্য বলে প্রতিয়মান হচ্ছে। তবে পরবর্তীতে প্রয়োজনে Price Guide Update করার বিষয়টি অর্ন্তভুক্ত থাকতে হবে। Price Guide এর উপর অত্র দপ্তরের অন্যান্য মতামত নিম্নে প্রদত্ত হলোঃ-

1. Price guide for 'OT Complex' equipment and 'Other than OT Complex' equipment not clearly mentioned in the Head line.
2. HS Code for 'OT Complex' equipment and 'Other than OT Complex' equipment not separately mentioned.
3. Some equipment HS Code differ with majority equipment HS Code (for example Refrigerator HS Code is 84.18 and CD/VAT is 89.42% instead of 33.07%).
4. Besides CD/VAT, Warranty, Insurance & Tax, followings factors should be taken under consideration in price guide:
 - a. Foreign Training Cost (if required)
 - b. Transportation Cost (if delivered to user site)
 - c. PSI cost (if included)

বিষয়: SIAPS/MSH এর প্রস্তাবিত Price Guide for Medical Equipment হালনাগাদ (Upgrade version) সংক্রান্তে মতামত প্রদান।

সূত্র নং- ৪৫.১৬৫.১২১.০১.০০.০০১.২০১৪-৩৭, তারিখ-০১/০২/২০১৮খ্রি।

উপর্যুক্ত বিষয় ও সূত্রের প্রেক্ষিতে জানানো যাচ্ছে যে, SIAPS/MSH এর প্রস্তাবিত Price Guide for Medical Equipment হালনাগাদ (Upgrade version) সংক্রান্তে মতামত প্রদানের জন্য নিমিউ'র কর্মকর্তাদের সমন্বয়ে ০৩(তিন) সদস্যবিশিষ্ট কমিটি গঠন করা হয়। উক্ত কমিটির আহ্বায়ক জনাব মোঃ আনোয়ার হোসেন, টেকনিক্যাল ম্যানেজার(মেরামত) এবং সদস্য জনাব এ এইচ এম আব্দুল কুদ্দুস, সহকারী প্রকৌশলী ও শাখা প্রধান(রেফ্রি. এন্ড এলি) SIAPS /MSH এর প্রস্তাবিত Price Guide for Medical Equipment হালনাগাদ (Upgrade version) করতে Technical Specification, Country তথ্যসহ ১৫(পনের) দিনের সময় প্রয়োজন মর্মে জানিয়েছেন। কমিটির অপর সদস্য জনাব মোঃ আবুল হোসেন, টেকনিক্যাল ম্যানেজার(ট্রেনিং), SIAPS/MSH এর প্রস্তাবিত Price Guide for Medical Equipment টিকে খসড়া হিসেবে বিবেচনার সুপারিশ করেন। এখানে উল্লেখ্য যে, SIAPS/MSH এর প্রস্তাবিত Price Guide for Medical Equipment এর মূল খসড়া প্রণয়নে এবং হালনাগাদ (Upgrade version) চূড়ান্তকরণ কর্মশালায় নিমিউ এন্ড টিসি সক্রিয়ভাবে অংশগ্রহণ করেছে এবং সুচিন্তিত মতামত প্রদান করেছে।

এমতাবশ্যায়, সংযুক্ত Price Guide for Medical Equipment হালনাগাদ version টি প্রথম সংস্করণ হিসেবে বিবেচনা করা যেতে পারে এবং ব্যবহার পরবর্তী যে কোন মতামত অন্তর্ভুক্ত করে ভবিষ্যতে হালনাগাদ (Upgrade) করার বিষয়টি মোটামুটিভাবে অন্তর্ভুক্ত করা যেতে পারে।

সংযুক্তি- ০১(এক) পাতা।
